

flu shot reminder

As part of your prenatal care,
your doctor recommends getting a flu shot
anytime during your pregnancy.

Getting a flu shot
is a safe way to prevent
possible flu-related
complications.

Millions of pregnant
women have safely
received flu shots
for many years.

Pregnant women should
not get the nasal spray
vaccine.

A flu shot during
pregnancy protects both
mom and baby (up to 6
months of age) from flu.
